

Tony Blondeau NYA

Fullstack Software Engineer

Fullstack Software Engineer with 4+ years of experience building scalable web applications, REST APIs, and microservices in e-commerce, fintech, Saas, and research. Skilled in API design, automated testing, backend architecture, system design, problem solving, frontend integration, and DevOps workflows. Worked internationally across Canada and Africa, delivering client-specific software solutions.

WORK EXPERIENCE

Backend Software Engineer | Freelance

2023 - now

- GLOTECHT | [Live](#)
- Glossary application for a PhD linguistics researcher at Dalhousie University (Halifax, Canada)
- Designed and deployed a Flask REST API serving bilingual terminology data with 99.9% uptime
 - Implemented a SQLite database, optimizing query performance for 500+ terms (AI, Blockchain, Big Data)
 - Built secure authentication system and an admin dashboard, achieving 90% thesis committee approval

- Abibi Meublés | [Live](#)
- Managing furnished apartments of a rental platform for a local client
- Built RESTful API with 23 endpoints (auth, apartments, reservations, admin) using FastAPI + SQLAlchemy
 - Implemented JWT authentication with role-based access control and secure password hashing
 - Delivered +20% increase in bookings through optimized booking flow and real-time availability API

Open Source Web Developer | GitHub (All In Open Source)

Nov. 2023 - Feb. 2024

- Resolved 10+ backend issues across community-driven repositories (APIs, data handling, auth), reducing bug backlog and improving service reliability
- Submitted and reviewed 15+ PR/MR, enforcing clean architecture, test coverage, and maintainability standards adopted by project maintainers.
- Led a team of three developers to design and deliver scalable backend prototypes during hackathons
- Developing CI/CD pipelines with GitHub Actions for automated deployments

PROJECTS

- Jobacker - AI-Powered Job Application Scorer, Reviewer & Tracker System | [Source](#) | [Live](#)
- Express, Google Gemini API, Zod, InsForge BaaS (PostgreSQL, auth, storage), Render, PostHog (monitoring)
- React, TypeScript, Tailwind, Framer Motion, GSAP, Recharts | Vercel
- Built an AI-powered job application tracker using Gemini to score resumes against job descriptions, identify skill gaps, and suggest improvements
 - Engineered automated cover letter and resume tailoring from a single base resume, reducing preparation per application from ~30 minutes to seconds
 - Designed an interactive Kanban dashboard with real-time analytics and data visualizations using React, Framer Motion, and Tailwind CSS v4
 - Implemented PostgreSQL, auth, and file storage via InsForge BaaS with RLS, plus an Express API with Zod validation

- Lingora - AI-Powered Text Translation Service | [Source](#) | [Live](#)
- FastAPI, PostgreSQL, SQLite, SQLAlchemy, Gemini API (google-genai SDK), HTML/CSS/Tailwind/JS, Axios
- Built fullstack translation app (50+ languages) with async SQLAlchemy job queues and polling status updates
 - Implemented multi-model routing to free-tier Gemini model with quota-aware fallback and real-time progress
 - Designed retro-futuristic dark UI (HelixDot-style progress, glass panels, system notifications) in vanilla HTML/CSS/JS

- Paylite - Fintech Dashboard Platform | [Source](#) | [Live](#)
- React, TypeScript, Tailwind, Axios, Vercel, Flask, PostgreSQL, SQLAlchemy, JWT/RBAC, Docker, Hugging Face
- Developed an ACID-compliant transaction engine with PostgreSQL to ensure zero balance errors for 10k+ users
 - Engineered a REST API with JWT-based RBAC, maintaining sub-100ms response times at scale
 - Improved query performance by 40% through server-side pagination and strategic PostgreSQL indexing

- Echoo - Real-time chat application | [Source](#) | [Live](#)
- Django, RabbitMQ, uWSGI, WebSockets, PostgreSQL, Redis, JWT, Vue, Tailwind, TypeScript
- Designed a RESTful API with Django REST Framework, handling 1K+ message requests/day with 99.9% uptime
 - Implemented WebSocket communication via uWSGI and RabbitMQ, with a <50ms real-time message latency
 - Optimized SQL queries using indexing and select_related(), improving database read performance by 40%

EDUCATION

- Software Engineering - Back-End Specialization
- 12-month Coding Bootcamp (ALX & Holberton School, Remote)
- Frontend Engineering - HTML/CSS/JS, React, Angular, Figma
- 6-month Coding Bootcamp (Sayna Academy, Remote)
- Bachelor in Computer Science
- 3-year University (Dschang University, On-site, Cameroon)

TECHNOLOGIES

- AI Tools:
- Opencode, Claude Code, Antigravity, LangChain,
- Languages:
- Python, JS/TS, Bash, C, SQL
- Frameworks:
- FastAPI, Flask, Django, Streamlit, Node.js, Express, React, Angular, Vue, Tailwind, Bootstrap, SaSS, Vitest, Pytest, Jest
- Databases:
- SQLite, PostgreSQL, MySQL, MongoDB, Firebase
- DevOps & Tools:
- Docker, Git/GitHub, GitHub Actions
- Cloud & Platforms:
- AWS, Render, Vercel, Linode

CERTIFICATIONS

- AI Career Essentials
- ALX
- All In Open Source Contributor
- GitHub
- JS Algorithms & Data Structures
- freeCodeCamp
- Responsive Web Design
- freeCodeCamp
- Learn Intermediate TypeScript
- Codecademy
- Problem Solving
- HackerRank
- Python
- HackerRank

LANGUAGES

- French: Native
- English: Intermediate (Technical proficiency)

Recommendation letter for Tony Blondeau NYA

Dear colleague -

I hope this finds you well.

I'm writing to you to **strongly endorse** Tony Blondeau NYA for a role in your company.

We are a social venture that supports high-potential tech and IT professionals from non-European countries in finding challenging roles in any country. We run a **highly selective** digital boot camp covering a broad range of profiles across software and systems engineering, cloud and infrastructure, data and analytics, quality assurance, and product disciplines. Throughout the program, we identify candidates whose talent, motivation, and work ethic clearly distinguish them from their peers.

Tony Blondeau NYA is an outstanding Backend engineer who ranks in the top 10% of our peer group.

Communication skills: Strong – validated in multiple rounds of 1:1 interviews

Technical skills: High & up to date – on par with candidates in Germany

EU 'Blue Card' eligibility: Yes - University/degree fully recognized - very smooth visa process

Maturity: Mid-level (3+ to 5 years experience)

Please feel free to reach out to me personally at emma@joinimagine.com or via [LinkedIn](#) in case of any questions.

Warm regards & herzliche Grüße -

Emma Felsenstein | Co-Managing Director

Imagine Foundation e.V. | Talent without borders

We are a community of Tech & HR professionals who believe in the power of diversity. We coach hundreds of engineers each year and connect our most promising Fellows with leading firms in Europe.
